

Music Interface

...

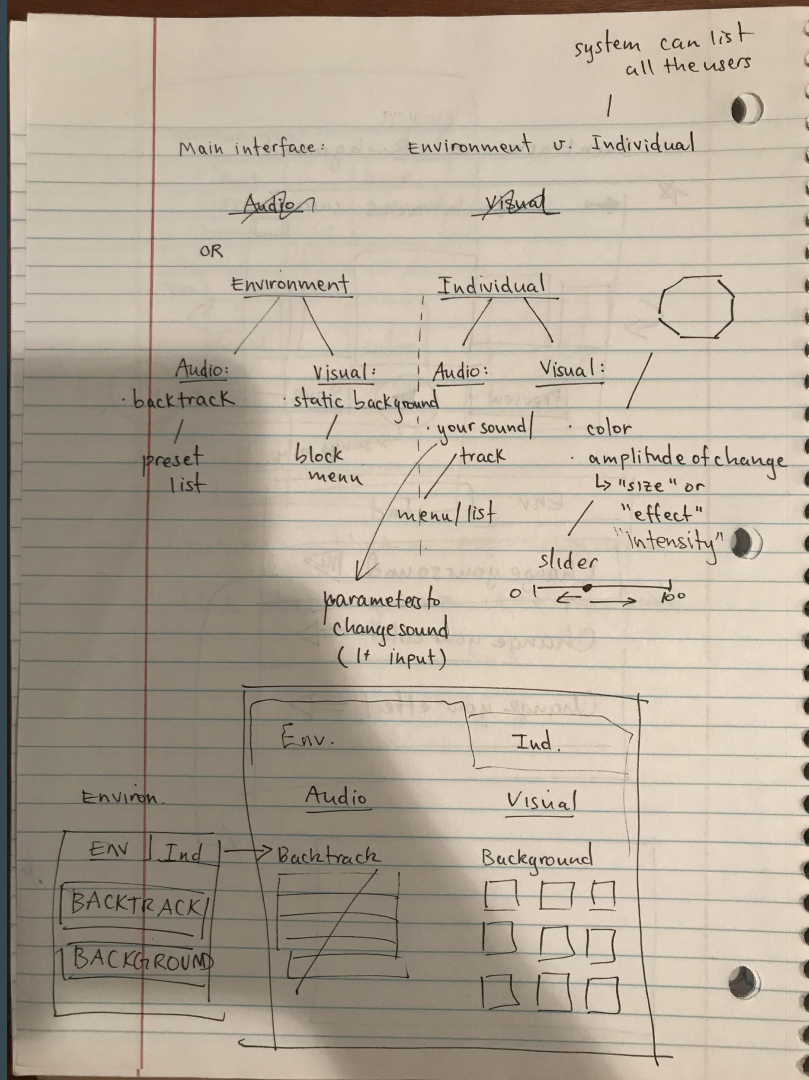

Crit 1

What are we doing?

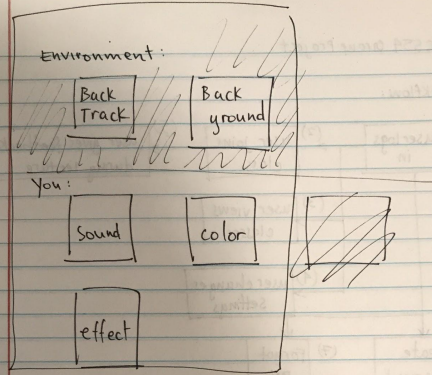

- Creating a touchscreen interface for the space.
- Allow for user and theme customization.
- Make the experience both personal and communal.

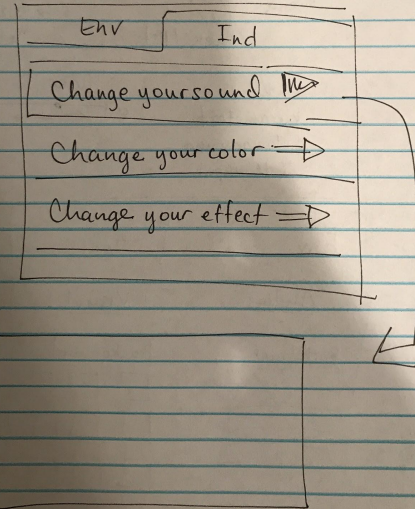

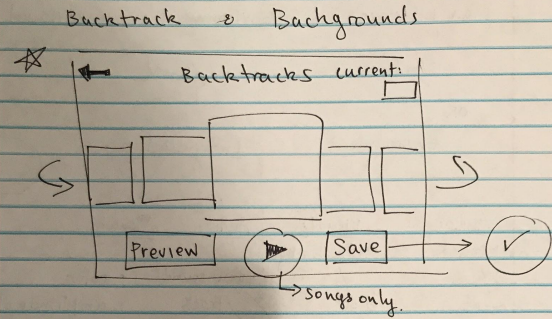

Brainstorming

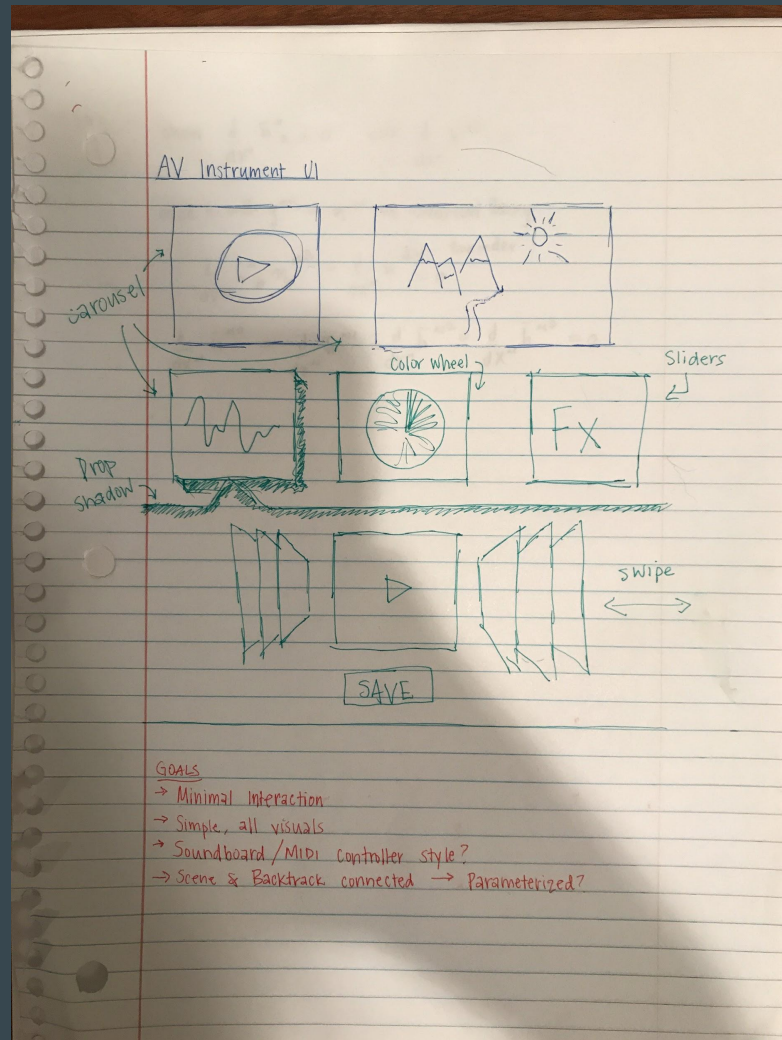

Deciding on a design

Clicking a block = pop-down screen
Click block again = close pop-down

Deciding on a design (cont.)

Our plan moving forward

- Make UI skeletons in React Native
- Start developing components (background settings, user settings)
